SETTING & ROLES

◀ ION HAVEN

Ion Haven is a near-future industrial sprawl built around batteries, storage farms, and corporate leverage. Blackouts aren't accidents — they're pressure tools. The grid is unstable, logistics are weaponized, and every faction trades in power.

◀ THE RUNNER + MILA

You play as The Runner: a pragmatic infiltrator living contract to contract. Your guide, Mila Calmer, is coldly charismatic — she explains systems, warns you, and occasionally roasts you with sharp irony.

Opposition: “The Powers” — corporate operators, private security, automated defenses, and rival crews hunting the same energy.

GAMEPLAY

◀ AMP IS YOUR RESOURCE

Battery Heist is built around one rule: AMP is both your life and your currency. Every raid becomes a tactical time-management problem — when to move, what to carry, and how long you can stay before lockdown pressure hits.

◀ EXTRACTION ECONOMY

Raids are compact stealth puzzles with escalating consequences. Detection ramps security response, mistakes compound, and loot matters only if you extract alive. Greed is punished; discipline is rewarded.
